Interactive Tools

Slide show, instant polls and surveys, twitter integration, interactive World Map, Q&A Manager...

Customizable Platform

Fully branded web-based platform with company logo, colors and banners

Unique Record & Replay

On-demand event webcasting with fully interactive replay technology

Our live event webcasting solution broadcasts HD (high definition) video and audio in a customizable and secure web-based environment. Expand your audience to include online participants while creating an engaging and interactive experience for both on-site and remote attendees.

We will work with your event planners and share best practices to take your event beyond the ballroom and into the PC or mobile devices of your global audience at an affordable fee.

Live Event Webcasting is perfect for corporate communication, employee training, product launches and other events. Our industry leading webcasting technology will allow you to reach more

viewers to achieve even greater results.

Advanced features such as slide show supporting all animations and hyperlinks, integrated eLearning tools, instant polls and surveys, twitter integration, combined with HD video and audio broadcast ensure your online attendees will not only watch but also participate and actually experience your event.

Beyond technology, our consultants will work with you to design, setup and deliver your events using industry best practices. Contact us to discuss how we can help you get the most out of your next event.

“ Taking our events online with this easy-to-use webcasting technology increased our audience and revenue.. ”

Bill Possiel - President
National Forest Foundation

Extend your Audience with a live webcast

HD (High Definition) Video and Audio: Supports 30 fps (frames per second) in H.264 format with the ability to set video width and height. Attendees can choose between two HD and SD streams and expand image to full screen

Slide Show Presentation: Microsoft PowerPoint 2003, 2007 and 2010 with full support for all animations and transitions. Annotation tools let presenters add notes or use a laser pointer.

Instant Poll: Polling and survey facility with multiple-choice questions, real-time results sharing and full reporting.

Event Registration: Online event registration system with automated reminders, follow-up emails and event analytics (reporting).

Recast: This unique replay technology allows you to record and replay an event interactively immediately after the event.

Fully Customizable Interface: Your virtual room can be easily branded with your logo, colors and banners including sponsors logo.

Mobile Support: A mobile app for Android and Apple devices such as iPhone or iPad enables viewers on the go to participate at your events.

Closed Captioning: The Closed Captioning tool and API enable TV-style captioning for better communication and 508-compliance. This tool is compatible with industry standards.

Credit Card Integration: Optional module that allows you to charge your online attendees at the time of the registration.

Chat and Q&A Manager: Online attendees can type questions or comments.

omniTweet: Updates a given Twitter search feed every 10 seconds and also allows online participants to tweet within the virtual room.

World Map: Shows the location of all online participants on a map.

Documents Sharing: Online attendees may download documents (PDFs, MS Word...) into their computers or access specific web
