MERAKI-NETWORK ADMINISTRATION

We are proud to offer the Cisco Meraki line of products for network administration and security appliances. We offer the MX line of internet security switches that allow for cloud management of your firewall. We also offer the MS line of switches to centrally manage your network. The MR line is used for building wireless networks within your organization and collecting data from those networks.

FLEXIBLE SOLUTIONS FOR YOUR ORGANIZATION

We also offer some of Meraki's digital assets such as the SM mobile device management platform and the Meraki online network management tool. The SM program allows you to easily control the mobile devices that are connected to your network. The online network management tool allows you to easily manage your network from any internet connected computer in the world. This gives you complete control of your network even if you are unable to be in the office.

We invite you to **contact us** so we can show you how to bring your business into the future. With the latest in **Cloud Network** technology and a team of **dedicated** telecom advisors to **guide you** from start to finish.
